professional club. The Native Plant Society of the University of Alaska and UAF have created opportunities for the appearance of many species that are less common. Even if I just could't resist peeping on the backdrops. It seems that even had they been fortunate to find them, they have missed on the time, as I thought I would offer something positive. Whatever the case, take advantage of every opportunity offered through the S.N.P.S. to explore the ever changing variety of our natural resources.

The success of the Native Plant Society, however, are certainly not accidental or caused by the time. It is an organization run entirely by volunteers, success is achieved only when someone gives freely of their time and other money. And there are some very special people who deserve to be recognized for their valuable personal qualities. They are the ones who
