

the site. The higher quality of existing facilities for the meeting, programs, and accommodations. This is where visiting scientists stay when they are working in the cave and, being off season, it has been reserved for us this particular weekend.

In addition to space for our meeting, the Poplar Springs facility includes 20 bunkrooms that bunkhouses plus also have in a cabin type. We will need to bring sleeping bags and food. Reservations can also be made to stay at the Mammoth Cave Hotel for those who prefer to be properly prepared at off season rates.

Poplar Springs has complete shower and bathroom facilities as well as a commercial kitchen. It is equipped with cooking and eating utensils for those wishing to try a good lunch on Friday and Saturday evenings.

We'll start at the old Job Corps Site, as well as the Woodruff Woods Project that is now the top item priority at NCEM. How can we why it has top priority?

Julian Campbell, who did the pre-burn surveys for these sites, will be with us so we will have a pretty good idea of the first year results when still in the field. The old Job Corps Site is a project led by Nancy Ferguson. It is also a new home for the National Forest System's conference, restoration efforts, that we started there last year.

On the way to Woodruff Woods, we will stop at the original 41, 42, 43 sites. It was supposed to be finished this year, but since construction was postponed we will have another chance to move the area in
